

Ring size guide

US sizes 5.5, 6.5 and 7 verified on a ring mandrel. EU equivalents and the measurements in this guide are references.

Before you begin

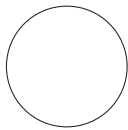

Print at 100% or actual size. Turn off "Fit to page". Check that the line below measures exactly 50 mm; if it does not, do not use the circles to measure.

50 mm

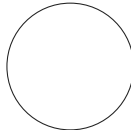

1. Measure a ring

Use a ring that fits the same finger on the same hand. Place it over the circles: the inside edge of your ring should match the outside edge of the printed circle. Do not include the metal.

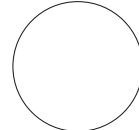

US 5.5 / EU 51

16.1 mm

US 6.5 / EU 53

16.9 mm

US 7 / EU 54

17.3 mm

2. Measure your finger

Wrap a narrow strip of paper around the base of your finger without pulling tight. Mark where the ends meet and measure the length in millimetres. This is the circumference. Also check that the ring can pass over your knuckle.

US	EU approx.	Inside diameter	Finger circumference
5.5	51	16.1 mm	50.6 mm
6.5	53	16.9 mm	53.1 mm
7	54	17.3 mm	54.4 mm

Measure at the end of the day and repeat the measurement. Band width and design can affect fit. If you are between sizes, or your reference ring is open or irregular, ask us before ordering.
